

SENTINELX AI

ENTERPRISE INCIDENT INVESTIGATION REPORT

Automated Forensics, AI Analysis & Threat Mitigation Report

Incident ID:	9c3cf765-e572-4653-b6a1-a3a1b1dd85de
Report ID:	REP-9C3CF765
Generated Time:	09 Aug 2026 • 08:48:30 IST
Assigned Analyst:	soc_admin (N/A)
Classification:	CONFIDENTIAL — RESTRICTED SOC REPORT
Incident Status:	OPEN

Table of Contents

- 1. Cover Page & Metadata
- 2. Executive Summary
- 3. Incident Details
- 4. Attack Analysis
- 5. AI Inference & Quality Gate Analysis
- 6. Explainability & SHAP Feature Contributions
- 7. Chronological Incident Timeline
- 8. MITRE ATT&CK; Mapping & Threat Intelligence
- 9. Evidence & Artifact References
- 10. Deterministic Remediation Recommendations
- 11. Appendix & Cryptographic Audit Verification

2. Executive Summary

On 2026-08-09T14:18:30.368801+05:30, SentinelX AI detected a **Spear Phishing Email - Executive Impersonation** attack classified with **HIGH** severity targeting **system**. The active machine learning inference model (**xgboost vv1.0**) evaluated the incoming feature telemetry and predicted **MALICIOUS** with **65.0% confidence**. The quality gate validation status for this inference engine is **WARNING**. The current incident lifecycle status is **OPEN**.

3. Incident Details

Incident Title:	Automated Incident: Spam / Phishing Email
Incident UUID:	9c3cf765-e572-4653-b6a1-a3a1b1dd85de
Attack UUID:	9154dd96-f3cd-4f8a-a345-31f0cc8cce8b
Opened Time:	2026-08-09T14:18:30.374339+05:30
Closed Time:	Active / Unclosed
Priority / Severity:	HIGH / HIGH
Affected Component:	system
Assigned User:	soc_admin

4. Attack Analysis

Attack Type:	Spear Phishing Email - Executive Impersonation
Source / Target:	Inbound Network → system
Timestamp:	2026-08-09T14:18:30.368801+05:30
Severity:	HIGH
Status:	COMPLETED

Payload / Attack Telemetry Indicator:

```
{'subject': 'URGENT: Quarterly Financial Audit & Payroll Re-verification', 'sender': 'ceo-office@company-corp-security.com', 'body': 'Dear Finance Team,\n\nPlease log into the security portal immediately using the link below to verify your corporate credentials for the mandatory Q3 audit.\n\nLink: http://secure-corporate-auth-verify.com/login?id=88493\n\nBest,\n\nExecutive Office', 'headers': {'X-Originating-IP': '185.220.101.5', 'SPF': 'FAIL', 'DKIM': 'FAIL'}}
```

5. AI Analysis & Model Provenance

Algorithm:	xgboost	Model Version:	v1.0
Dataset Version:	cyber_telemetry_dataset	Pipeline Version:	p1.0
Prediction Label:	MALICIOUS	Confidence:	65.0%
F1-Score:	0.0	Quality Gate:	WARNING

6. Explainability & SHAP Contributions

SHAP Base Value (Expected Model Baseline): 0.1

Top Positive Feature Contributors (Increasing Malicious Risk):

Feature Name	SHAP Contribution Value
Payload Keyword Entropy	+0.000000

Top Negative Feature Contributors (Decreasing Malicious Risk):

None identified.

7. Chronological Incident Timeline

Timestamp (UTC)	Event Action	Resource	Details
2026-08-09T14:18:30	EVENT_PIPELINE_COMPLETE	Attack	Event pipeline finished for attack 9154dd96-f3cd-4f8a-a345-3

8. MITRE ATT&CK; Mapping & Threat Intelligence

Technique ID:	T1190
Technique Name:	Exploit Public-Facing Application
Tactic:	Initial Access / Execution
Description:	Adversaries attempt to exploit security vulnerabilities in targeted infrastructure applications to compromise availability or integrity.
Standard Mitigation:	Apply timely security security patches, maintain web application firewalls (WAF), enforce strict input sanitation, and perform regular vulnerability assessments.

9. Evidence & Artifact References

Prediction ID:	d66e515c-f018-4161-89ef-6dcd74966379
Explanation ID:	305682d1-15e0-4e30-a7e8-e98ee5cca51a
Model Artifact File:	xgboost.bin
Dataset Reference:	cyber_telemetry_dataset

10. Deterministic Remediation Recommendations

Category	Action Item	Technical Details
Incident Response	Isolate Affected Infrastructure Host	Quarantine the impacted host from the corporate production network pending forensic analysis.
Access Control	Revoke Compromised Session Tokens	Force-expire active user authentication sessions associated with the flagged detection.
Hardening	Apply Emergency Vendor Security Patches	Patch identified software vulnerabilities and update endpoint intrusion signatures.

11. Appendix & Cryptographic Audit Metadata

Platform Version:	SentinelX AI v2.4 (Enterprise)
Report Engine Version:	v5.1 (Deterministic SOC Reporter)
Generation Timestamp:	09 Aug 2026 • 08:48:30 IST
PDF Renderer Engine:	ReportLab PDF Toolkit
