

SENTINELX AI

ENTERPRISE INCIDENT INVESTIGATION REPORT

Automated Forensics, AI Analysis & Threat Mitigation Report

Incident ID:	af1a1c1c-ac92-409b-9182-40f243377af6
Report ID:	REP-AF1A1C1C
Generated Time:	09 Aug 2026 • 09:21:24 IST
Assigned Analyst:	Unassigned (N/A)
Classification:	CONFIDENTIAL — RESTRICTED SOC REPORT
Incident Status:	OPEN

Table of Contents

- 1. Cover Page & Metadata
- 2. Executive Summary
- 3. Incident Details
- 4. Attack Analysis
- 5. AI Inference & Quality Gate Analysis
- 6. Explainability & SHAP Feature Contributions
- 7. Chronological Incident Timeline
- 8. MITRE ATT&CK; Mapping & Threat Intelligence
- 9. Evidence & Artifact References
- 10. Deterministic Remediation Recommendations
- 11. Appendix & Cryptographic Audit Verification

2. Executive Summary

On 2026-08-09T09:21:24.455051, SentinelX AI detected a **SQL Injection - Auth Bypass & Union Extraction** attack classified with **CRITICAL** severity targeting **system**. The active machine learning inference model (**xgboost vv1.0**) evaluated the incoming feature telemetry and predicted **MALICIOUS** with **85.3% confidence**. The quality gate validation status for this inference engine is **WARNING**. The current incident lifecycle status is **OPEN**.

3. Incident Details

Incident Title:	Automated Incident: SQL Injection Attack
Incident UUID:	af1a1c1c-ac92-409b-9182-40f243377af6
Attack UUID:	06ddf616-663a-4a20-9555-f38bcdcd0700
Opened Time:	2026-08-09T09:21:24.474187
Closed Time:	Active / Unclosed
Priority / Severity:	CRITICAL / CRITICAL
Affected Component:	system
Assigned User:	Unassigned

4. Attack Analysis

Attack Type:	SQL Injection - Auth Bypass & Union Extraction
Source / Target:	Inbound Network → system
Timestamp:	2026-08-09T09:21:24.455051
Severity:	CRITICAL
Status:	COMPLETED

Payload / Attack Telemetry Indicator:

```
{'target_endpoint': '/api/v1/auth/login', 'http_method': 'POST', 'parameters': {'username': 'admin' OR '1'='1', 'password': "' UNION SELECT 1, username, password_hash, role FROM users--"}, 'user_agent': 'Mozilla/5.0 (Windows NT 10.0; Win64; x64) Sqlmap/1.6.4'}
```

5. AI Analysis & Model Provenance

Algorithm:	xgboost	Model Version:	v1.0
Dataset Version:	cyber_telemetry_dataset	Pipeline Version:	p1.0
Prediction Label:	MALICIOUS	Confidence:	85.3%
F1-Score:	0.0	Quality Gate:	WARNING

6. Explainability & SHAP Contributions

SHAP Base Value (Expected Model Baseline): 0.1

Top Positive Feature Contributors (Increasing Malicious Risk):

Feature Name	SHAP Contribution Value
Payload Keyword Entropy	+0.000000

Top Negative Feature Contributors (Decreasing Malicious Risk):

None identified.

7. Chronological Incident Timeline

Timestamp (UTC)	Event Action	Resource	Details
2026-08-09T09:21:24	EVENT_PIPELINE_COMPLETE	Attack	Event pipeline finished for attack 06ddf616-663a-4a20-9555-f

8. MITRE ATT&CK; Mapping & Threat Intelligence

Technique ID:	T1190
Technique Name:	Exploit Public-Facing Application
Tactic:	Initial Access
Description:	Adversaries may attempt to exploit a weakness in a public-facing web application (e.g. SQL Injection) to execute arbitrary database queries or access unauthorised data.
Standard Mitigation:	Use parameterized queries (prepared statements), input validation, web application firewalls (WAF), and least-privilege database accounts.

9. Evidence & Artifact References

Prediction ID:	2617e09d-2abc-4f03-893e-50e011dc37c2
Explanation ID:	d6960b3b-4bf1-49aa-8f84-383bbae16943
Model Artifact File:	xgboost.bin
Dataset Reference:	cyber_telemetry_dataset

10. Deterministic Remediation Recommendations

Category	Action Item	Technical Details
Code Fix	Implement Parameterized Queries / Prepared Statements	Ensure all database queries use bound parameters to eliminate SQL payload execution.
Edge Control	Configure Web Application Firewall (WAF) SQLi Rules	Enable WAF inspection rules targeting UNION, SELECT, and quote injection patterns.
Input Validation	Enforce Strict Type & Schema Validation	Validate and sanitize all user-supplied HTTP parameters prior to application processing.

11. Appendix & Cryptographic Audit Metadata

Platform Version:	SentinelX AI v2.4 (Enterprise)
Report Engine Version:	v5.1 (Deterministic SOC Reporter)
Generation Timestamp:	09 Aug 2026 • 09:21:24 IST
PDF Renderer Engine:	ReportLab PDF Toolkit
